

Info form for WSBE17 Sustainable Buildings Challenge

The SBE Buildings Challenge at WSBE17 Hong Kong will take place on 6 June (Session 42) and Session 84 (7 June). The sessions will focus on Building Performance Evaluation (BPE) including the assessment protocols used and case studies.

All case studies are expected to include key operating performance indicators that are objective and measurable, for at least energy, emissions, water and indoor environmental quality. Occupant surveys are highly desirable.

Teams or individuals who participate will have 20 minutes presentation time plus 10 minutes per case study, as well as wall space for A1 posters.

Participants are requested to provide relevant background information as follows:

Your name:

Location (City/Country):

Your e-mail:

We wish to:

Present our approach or protocol for BPE

Present case studies (specify type and location below)

Case 1:

Case 2:

Case 3:
